

Key Features:

- Quick / easy torque adjustment
- Quick / easy change between interfaces
- Lightweight / compact
- Requires low maintenance

J2 Subsea Clutch Tool 17D / Paddle 40-200NM

Torque Tools and Accessories

The manipulator clutch tool is designed to allow the operator to function low torque valves without the need for a hydraulic driven torque tool.

Supplied with 40-100NM and 80-200NM s/s clutches allows the operator to quickly and easily set the tool to the required max torque prior to deployment.

J2 Subsea Clutch Tool 17D / Paddle 40-200NM
