

Key Features:

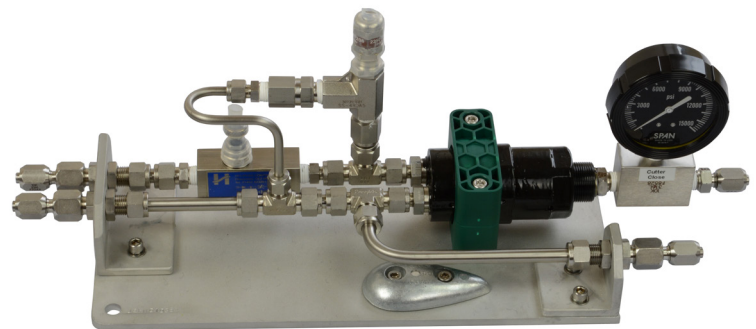

- Requires low maintenance
- Ready for installation to ROV
- No set up required, all valves preset for max cutter operation and operator protection

J2 Subsea Intensifier Panel 4:1 Ratio

Intensifier Panels

The intensifier panel is designed to operate any of the high pressure cutters and can be used to operate any tool that requires 10,000 PSI (690 Bar).

The panel is designed and built with all the necessary pipe work and valving to allow easy installation to the ROV.

J2 Subsea Intensifier

Panel 4:1 Ratio

Intensifier Panels

Specifications

Weight	Weight in air	12Kg
Intensifier ratio	4:1	
Hydraulic oil grade	22 - 32 recommended	
Hydraulic input	Flow	14 LPM
	Pressure	210 Bar
Hydraulic output	Flow	2 LPM via intensifier
	Pressure	690 Bar via intensifier
